Processes

- Reminder: [AUTH48 archive](#) available

- Non-ASCII allowed in <t> (without <u>) in some cases

   From the [Online Portion of the Style Guide](#):

      The <u> element is required for cases where the non-ASCII characters are needed for correct protocol operation.

   Example of <u> output: "שׁ" (HEBREW LETTER SHIN, U+05E9)

IETF 114 Workshop on Using GitHub during AUTH48

Summary

Reminder: Tools Modernization (ongoing)

RFC Production Center Tools Modernization Project

A new tool chain to support editing and publishing end to end is needed

Jean Mahoney will be doing the following in her role as project manager:

- ○ Creating the specification for the new tool chain

- ○ Helping the RPC decide their preferred modernization path

- ○ Managing tool chain development, implementation, testing, and training
