

The `scripture` package

David Purton*

2023/12/27 v2.0

Abstract

The `scripture` package provides a set of macros for typesetting quotations from the Bible. It provides many features commonly seen in Bibles such as dropped text for chapter numbers, superscripts for verse numbers, indented lines for poetry sections, narrow sections and hanging paragraphs. A reference for the quotation can optionally be added.

1 Introduction

Bibles tend to use a number of standard features when laying out chapters and verses. The main goal for the `scripture` package is to be able to quickly and easily input text and have it output nicely with minimal manual adjustment.

The package supports dropped text for chapter numbers, superscripts for verse numbers, appropriately indented lines for the first and second halves of poetry, flush right sections, centred sections, narrow sections and hanging sections.

The package could be used for typesetting an entire Bible, but it is mainly envisioned that it will be used for producing Scripture quotations. The passage reference can be included on the last line if there is space or failing that on the following line.

1.1 Bug reports and feature requests

Bug reports and feature requests can be made at the `scripture` package GitHub repository. See <https://github.com/dcpurton/scripture>.

1.2 Limitations

The scripture package makes extensive use of L^AT_EX list environments and the \parshape command. This means there are some limitations. In particular, you should not:

- Nest the `scripture` environment or any of its internal environments.
- Modify the `\parshape` within a `scripture` environment.
- Include any other list based environment within a `scripture` environment.

The `poetry` environment uses `\obeylines`. This means that it can not be placed in the argument of a macro.

Some attempt is made to encourage appropriate page breaks, especially just before a reference is added to a quotation, but this can still sometimes fail and a reference will end up on the following page. Usually a little more stretchable space on the page before the incorrect break is enough to obtain acceptable output.

At least version 2022-11-01 of the L^AT_EX format is required.

2 Documentation

2.1 Basic usage

Scripture quotations must be set within a `scripture` environment. A simple quotation might be produced as follows:

```
\begin{scripture}[Isaiah 56:1--2] [version=NIVUK]
\ch{56}This is what the \name{Lord} says:
\begin{poetry}
‘Maintain justice
and do what is right,
for my salvation is close at hand
and my righteousness will soon
be revealed.

\vs{2}Blessed is the one who does this---
the person who holds it fast,
who keeps the Sabbath without desecrating it,
and keeps their hands from doing any evil.’
\end{poetry}
\end{scripture}
```

56 This is what the LORD says:

‘Maintain justice
and do what is right,
for my salvation is close at hand
and my righteousness will soon
be revealed.

²Blessed is the one who does this—
the person who holds it fast,
who keeps the Sabbath without
desecrating it,
and keeps their hands from
doing any evil.’

Isaiah 56:1–2 (NIVUK)

2.2 Macros for typesetting scripture quotations

2.2.1 Functions

`\added` `\added{\langle words \rangle}`

New: 2022-11-15 Some Bible translations mark out words added for clarity not found in the original language (e.g., in italics). This can be done using the `\added` function. The font and format can be set using the `added/font` and `added/format` options.

```
\begin{scripture}[John 1:18][verse/font=\bfseries,
verse/format=#1, verse/sep=0.5em, version=KJV]
\vs{18}No man hath seen God at any time, the
only begotten Son, which is in the bosom of the
Father, he hath declared \added{him}.
\end{scripture}
```

18 No man hath seen God at any time, the only begotten Son, which is in the bosom of the Father, he hath declared *him*.

John 1:18 (KJV)

```
\ch \ch{\langle chapter number \rangle}
\ch* \ch*{\langle chapter number \rangle}
```

Format a chapter number. By default these are formatted using drop text taking up two lines and the text is separated from the chapter number by a horizontal space of 0.5 em.

If the `dropchap` option is `true` (default), then this function attempts to add sufficient space for the dropped chapter when its paragraph contains only one line. The starred version suppresses this behaviour.

\ch example

```
\begin{scripture}[Exodus 20:1--2]
\ch{20}And God spoke all these words:
\begin{hanging}
\noindent\vs{2}'I am the \name{Lord}
your God, who brought you out of Egypt,
out of the land of slavery.
\end{hanging}
\end{scripture}
```

\ch* example

```
\begin{scripture}[Exodus 20:1--2]
\ch*{20}And God spoke all these words:
\begin{hanging}
\nohang\vs{2}'I am the \name{Lord} your
God, who brought you out of Egypt, out of
the land of slavery.
\end{hanging}
\end{scripture}
```

\ch example

20 And God spoke all these words:
²I am the LORD your God, who
brought you out of Egypt, out of
the land of slavery.
Exodus 20:1–2

\ch* example

20 And God spoke all these words:
²I am the LORD your God, who
brought you out of Egypt, out of the
land of slavery.
Exodus 20:1–2

```
\extraskip \extraskip
```

Add a small vertical space of `extraskip` between a paragraph. This function attempts to add additional space to avoid a clash with a drop chapter if required.

```
\begin{scripture}[Colossians 1:2]
\vs{2}To God's holy people in Colossae, the
faithful brothers and sisters in Christ:

\extraskip

Grace and peace to you from God our Father.
\end{scripture}
```

²To God's holy people in Colos-
sae, the faithful brothers and sisters
in Christ:

Grace and peace to you from God
our Father. **Colossians 1:2**

```
\name    \name{<divine name>}
\LORD   \LORD
\GOD    \GOD
```

New: 2022-09-01

Modern Bible translations frequently represent God's personal divine name using a small capitals typeface. This can be done using the `\name` function. The font and format can be set using the `name/font` and `name/format` options. The `\LORD` and `\GOD` macros equivalent to `\name{Lord}` and `\name{God}` respectively.

Note: Watch out that trailing spaces are not eaten by `\LORD` and `\GOD`. Using `\name` is safer and semantically better.

```
\begin{scripture}[Genesis 15:1--2][version=ESV]
\ch{15}After these things the word of the
\name{Lord} came to Abram in a vision: “Fear
not, Abram, I am your shield; your reward shall
be very great.” \vs{2}But Abram said, “O Lord
\name{God}, what will you give me, for I
continue childless, and the heir of my house is
Eliezer of Damascus?”
\end{scripture}
```

15 After these things the word of the LORD came to Abram in a vision: “Fear not, Abram, I am your shield; your reward shall be very great.”¹⁰ But Abram said, “O Lord GOD, what will you give me, for I continue childless, and the heir of my house is Eliezer of Damascus?”

Genesis 15:1–2 (ESV)

```
\nofirstverse \nofirstverse
```

New: 2022-11-13

When `verse/first` is true, this causes the next `\vs` to print normally, rather than using the format specified by `verse/firstformat`. You might do this if your quote begins half way through a paragraph and the first verse should be printed normally.

```
\nohang \nohang
```

In a `hanging` environment, this function indents the first line of the paragraph a length of `hanging/hang + parindent`. Remaining lines continue to be indented by a length of `hanging/hang`.

```
\begin{scripture}[Genesis 1:10--11]
\begin{hanging}
\noindent\vs{10}God called the dry ground
‘land’, and the gathered waters he called
‘seas’. And God saw that it was good.

\nohang\vs{11}Then God said, ‘Let the land
produce vegetation: seed-bearing plants and
trees on the land that bear fruit with seed
in it, according to their various kinds.’
And it was so.
\end{hanging}
\end{scripture}
```

¹⁰God called the dry ground ‘land’, and the gathered waters he called ‘seas’. And God saw that it was good.

¹¹Then God said, ‘Let the land produce vegetation: seed-bearing plants and trees on the land that bear fruit with seed in it, according to their various kinds.’ And it was so.

Genesis 1:10–11

```
\redlettereron \redlettereron
\redletteroff \redletteroff
```

New: 2022-08-31 Use `\redlettereron` and `\redletteroff` to mark the beginning and end of sections of text that should be attributed to Jesus speaking. Some attempt is made to ensure that the correct colour continues after an inner environment if `\redlettereron` or `\redletteroff` occurs inside the inner environment. If you experience problems with unexpected colour, try to ensure that matching `\redlettereron` and `\redletteroff` marks occur at the same group level. The colour of the text can be set using the `redletter/colour` option. These commands only have an effect when the `redletter` option is true.

```
\begin{scripture}[Matthew 21:16--17][redletter]
\vs{16}`Do you hear what these children are saying?'
they asked him.

\redlettereron `Yes,' \redletteroff replied Jesus,
\redlettereron `have you
never read,
\begin{poetry}
`thinspace ``From the lips of children and infants
you, Lord, have called forth your praise'?
\end{poetry}\redletteroff

\vs{17}And he left them and went out of the city to
Bethany, where he spent the night.
\end{scripture}
```

16`Do you hear what these children are saying?' they asked him.

‘Yes,’ replied Jesus, ‘have you never read,

‘From the lips of children and infants you, Lord, have called forth your praise?’

17 And he left them and went out of the city to Bethany, where he spent the night.

Matthew 21:16–17

```
\scripturecurrentchapter \scripturecurrentchapter
\scripturecurrentverse \scripturecurrentverse
```

New: 2022-08-07 `\scripturecurrentchapter` and `\scripturecurrentverse` globally hold the most recent values parsed to `\ch` and `\vs`. They can be initialised with `\renewcommand*` if required and could be used in hooks, for example.

```
\scripturesetup \scripturesetup{<options>}
```

Set default format for quotations. See section 2.4 for supported formatting `<options>`.

```
\scripturestyle \scripturestyle{<name>}{<options>}
\scripturestyle* \scripturestyle*{<name>}{<options>}
```

New: 2023-12-27 Set `<options>` which are saved as style with `<name>`. These can later be set with the `style` option. The starred version appends `<options>` to an existing style rather than overwriting all options.

```
\selah \selah
```

New: 2022-07-29 In a `poetry` environment, this function inserts *Selah* at the end of the current line or the end of the following line if there is insufficient room. See options `selah/font`, `selah/format`, `selah/sep` and `selah/text` for options controlling the output.

```
\begin{scripture}[Psalm 3:2][version=NIV84]
\begin{poetry}
\vs{2}Many are saying of me,
‘God will not deliver him.’\selah
\end{poetry}
\end{scripture}
```

²Many are saying of me,
“God will not deliver him.”
Selah

Psalm 3:2 (NIV84)

\textright \textright{\text}

New: 2022-08-30 This function inserts `\text` at the end of the current line or the end of the following line if there is insufficient room. The `\textright/sep` option controls the minimum allowed space before the `\text` to be right aligned.

```
\begin{scripture}[Jeremiah 2:29]
\begin{poetry}
\vs{5}‘Why do you bring charges against me?
You have all rebelled against me,’
\textright{declares the \name{Lord}.}
\end{poetry}
\end{scripture}
```

⁵‘Why do you bring charges against
me?
You have all rebelled against
me,’
declares the LORD.
Jeremiah 2:29

\textscripture \textscripture[<reference>][<options>]{<quotation>}

New: 2023-01-07 `\textscripture` sets an inline scripture quotation. The quotation is surrounded by the values of `inline/begin` and `inline/end` which default to ‘‘\’, and ‘\,’’, respectively. This function also sets the `compact` option and places the `reference` inline. The reference format can be controlled using the following options:

- `inline/reference/format`
- `inline/reference/sep`
- `inline/version/delim`
- `inline/version/format`

Other `reference` and `version` options are inherited.

This function is equivalent to using the `scripture` environment with the `inline` option.

Warning: `\par` is redefined to `\relax` inside the `\textscripture` function. If you have anything other than expected macros and environments inside your `\textscripture` function TeX will likely get stuck in an infinite loop.

A famous verse in the Bible is:
\textscripture[John 3:16][verse-hide]{\vs{16}For
God so loved the world that he gave his one and
only Son, that whoever believes in him shall not
perish but have eternal life.}.

A famous verse in the Bible is: "For God so loved the world that he gave his one and only Son, that whoever believes in him shall not perish but have eternal life." (**John 3:16**).

\vs \vs{\langle verse number\rangle}

Format a verse number. By default these are formatted using a superscript.

2.2.2 Environments

All scripture quotations must be set within a `scripture` environment. The rest of the environments documented below are only defined with the `scripture` environment. In most cases there is a default small `<aboveskip>` and `<belowskip>` inserted above and below these internal environments, but these are ignored if the environment is at the start or end of a `scripture` environment.

```
center \begin{center}[<options>]  
          <centred text>  
        \end{center}
```

Environment for typesetting centred sections of scripture quotations.

See section 2.4.1 for supported formatting `<options>`.

```
\begin{scripture}[Daniel 5:25]
  \vs{25}`This is the inscription that was
written:
  \begin{center}
    \textsc{mene, mene, tekel, parsin}
  \end{center}
\end{scripture}
```

25 ‘This is the inscription that was written:

MENE, MENE, TEKEL, PARSIN
Daniel 5:25

flushright \begin{flushright}[(options)]
 right aligned text
 \end{flushright}

Environment for typesetting right aligned sections of scripture quotations.

See section 2.4.2 for supported formatting `<options>`.

```

\begin{scripture}[Isaiah 40:5]
  \begin{poetry}[belowskip = 0pt]
    \vs{5}And the glory of the \name{Lord}\ldots
    and all people will see it together.
  \end{poetry}

  \begin{flushright}[aboveskip = 0pt]
    For the mouth of the \name{Lord} \\
    has spoken.
  \end{flushright}
\end{scripture}

```

⁵ And the glory of the LORD...
and all people will see it
together.
For the mouth of the LORD
has spoken.'
Isaiah 40:5

```
hanging \begin{hanging}[\langle options\rangle]
    <hanging text>
\end{hanging}
```

Environment for typesetting hanging sections of scripture quotations.

See section 2.4.3 for supported formatting `\langle options\rangle`.

```
\begin{scripture}[Genesis 1:3--5]
\begin{hanging}
\vs{3}And God said, ‘Let there be light,’ and
there was light. \vs{4}God saw that the light
was good, and he separated the light from the
darkness. \vs{5}God called the light ‘day’,
and the darkness he called ‘night’. And there
was evening, and there was morn\-ing---the
first day.
\end{hanging}
\end{scripture}
```

³ And God said, ‘Let there be light,’ and there was light. ⁴ God saw that the light was good, and he separated the light from the darkness. ⁵ God called the light ‘day’, and the darkness he called ‘night’. And there was evening, and there was morning—the first day.

Genesis 1:3–5

```
midparachap \begin{midparachap}[\langle options\rangle]
    <text containing a chapter break>
\end{midparachap}
```

Environment for typesetting paragraph with a chapter break within it.

See section 2.4.4 for supported formatting `\langle options\rangle`.

```
\begin{scripture}[1 Corinthians 10:31--11:1]
\begin{midparachap}
\vs{31}So whether you eat or drink or
whatever you do, do it all for the glory of
God. \vs{32}Do not cause anyone to stumble,
whether Jews, Greeks or the church of
God---\vs{33}even as I try to please everyone
in every way. For I am not seeking my own
good but the good of many, so that they may
be saved. \ch{11}Follow my example, as I
follow the example of Christ.
\end{midparachap}
\end{scripture}
```

³¹ So whether you eat or drink or whatever you do, do it all for the glory of God. ³² Do not cause anyone to stumble, whether Jews, Greeks or the church of God—³³ even as I try to please everyone in every way. For I am not seeking my own good but the good of many, so that they may be saved. ¹ Follow my example, **11** as I follow the example of Christ.

1 Corinthians 10:31–11:1

```
narrow \begin{narrow}[\langle options\rangle]
    <quotation>
\end{narrow}
```

Environment for typesetting narrow sections of scripture quotations. If there is no blank line before the start of a `narrow` environment the indent will be suppressed.

See section 2.4.5 for supported formatting `\langle options\rangle`.

```
\begin{scripture}[2 Kings 18:18--19]
\vs{18}They called for the king; and Eliakim
son of Hilkiah the palace administrator, Shebna
the secretary, and Joah son of Asaph the
recorder went out to them.

\vs{19}The field commander said to them, ‘Tell
Hezekiah:

\begin{narrow}
‘\thinspace‘This is what the great king, the
king of Assyria, says: on what are you basing
this confidence of yours?
\end{narrow}
\end{scripture}
```

¹⁸They called for the king; and Eliakim son of Hilkiah the palace administrator, Shebna the secretary, and Joah son of Asaph the recorder went out to them.

¹⁹The field commander said to them, ‘Tell Hezekiah:

‘“This is what the great king,
the king of Assyria, says: on
what are you basing this con-
fidence of yours?

2 Kings 18:18–19

```
poetry \begin{poetry}[\langle options \rangle]
  \begin{poetry}
    \langle first half of verse \rangle
    \langle second half of verse \rangle
  \end{poetry}
  \langle first half of verse \rangle
  \langle second half of verse \rangle
\end{poetry}
```

Environment for typesetting poetry sections of scripture quotations.

Poetry sections of the Bible often have a first half and a parallel second half which is indented a little. These should be set on separate consecutive lines. Leaving a blank line indicates that the next line should return to the first half indent.

See section [2.4.6](#) for supported formatting `\langle options \rangle`.

```
\begin{scripture}[Isaiah 1:2]
\begin{poetry}
\vs{2}Hear me, you heavens! Listen, earth!
For the \name{Lord} has spoken:

‘I reared children and brought them up,
but they have rebelled against me.
\end{poetry}
\end{scripture}
```

²Hear me, you heavens! Listen,
earth!
For the LORD has spoken:
'I reared children and brought
them up,
but they have rebelled against
me.
Isaiah 1:2

```
scripture \begin{scripture}[\langle reference \rangle][\langle options \rangle]
  \begin{quotation}
  \end{quotation}
\end{scripture}
```

Main environment for typesetting scripture quotations.

The optional `\langle reference \rangle` is printed at the end of the quotation. See section [2.4](#) for supported formatting `\langle options \rangle`.

```
\begin{scripture}[John 3:16][version=NIV]
\vs{16}For God so loved the world that he gave
his one and only Son, that whoever believes in
him shall not perish but have eternal life.
\end{scripture}
```

¹⁶For God so loved the world that he gave his one and only Son, that whoever believes in him shall not perish but have eternal life.

John 3:16 (NIV)

2.3 Provided hooks

-
- scripture/chap/before** The following public hooks are available:
- scripture/chap/after**
- scripture/verse/before** **scripture/chap/before** This hook is executed immediately before the `chap/font` is set
- scripture/verse/after** for the chapter.
-
- New: 2022-08-07
- scripture/chap/after** This hook is executed immediately after the `chap/sep` space is inserted.
- scripture/verse/before** This hook is executed immediately before the `verse/font` is set for the verse.
- scripture/chap/after** This hook is executed immediately after the `verse/sep` space is inserted.

The following example illustrates how these hooks could be used to place the first and last verse on the page into the header.

```

\documentclass{article}
\usepackage{scripture}
\AddToHook{scripture/chap/after}{%
  \markboth
    {Mark \scripturecurrentchapter
     :\scripturecurrentverse}
    {Mark \scripturecurrentchapter
     :\scripturecurrentverse}}
\AddToHook{scripture/verse/after}{%
  \markboth
    {Mark \scripturecurrentchapter
     :\scripturecurrentverse}
    {Mark \scripturecurrentchapter
     :\scripturecurrentverse}}
\renewcommand*\scripturecurrentchapter{1}
\usepackage{fancyhdr}
\pagestyle{fancy}
\fancyhf{}
\lhead{\textbf{\rightmark}}
\rhead{\textbf{\leftmark} \textbar \thepage}
\begin{document}
\begin{scripture}[] [noindent]
\vs{45}Instead he went out and began to talk freely, spreading the news. As a result, Jesus could no longer enter a town openly but stayed outside in lonely places. Yet the people still came to him from everywhere.

\extraskip

\ch{2}A few days later, when Jesus again entered Capernaum, the people heard that he had come home.
\end{scripture}
\end{document}

```

Mark 1:45

Mark 2:1 | 1

⁴⁵Instead he went out and began to talk freely, spreading the news. As a result, Jesus could no longer enter a town openly but stayed outside in lonely places. Yet the people still came to him from everywhere.

2 A few days later, when Jesus again entered Capernaum, the people heard that he had come home.

2.4 Options

Default formatting `<options>` can be set using `\usepackage[<options>]{scripture}` or `\scripturesetup{<options>}`. Local formatting `<options>` can be set by passing them to the various environments described above.

aboveskip `aboveskip = <skip>` Default: `0pt`
`<skip>` inserted above the `scripture` environment.

added/font `added/font = ` Default: `Empty`
`New: 2022-11-15` `` used for the `\added` function.

added/format `added/format = <macro>` Default: `\emph{#1}`
`New: 2022-11-15` `<macro>` used to format the words that should be highlighted as added by the translators using the `\added` function. #1 contains the text of the argument to `\added`.

belowskip `belowskip = <skip>` Default: `0pt`
`<skip>` inserted below the `scripture` environment.

chapter/colour chapter/colour = *colour expression* Default: .
chapter/color The \color{<colour expression>} to be used for chapter numbers. By default the current colour is inherited. **chapter/color** is an alias for **chapter/colour**.
New: 2022-09-07

chapter/drop chapter/drop = *boolean* Default: true
Whether the chapter should be set as a drop letter taking up two lines or as a normal letter taking up one line. The value of *boolean* is optional and assumed to be **true** if not present. This option is the opposite of **chapter/nodrop**.

chapter/font chapter/font = *font* Default: \bfseries
<*font*> used for the \ch function.

chapter/format chapter/format = *macro* Default: #1
New: 2022-07-28 *macro* used to format the **chapter** for a scripture quotation. #1 contains the text of the chapter.

chapter/hide chapter/hide = *boolean* Default: false
New: 2022-08-15 Whether chapters should be shown or hidden. The value of *boolean* is optional and assumed to be **true** if not present. This option is the opposite of **chapter/show**. Note that the **scripture/chap/before** and **scripture/chap/after** hooks are still executed when chapters are hidden.

```
\begin{scripture}[Romans 5:1--2] [chapter/hide]
\ch{5}Therefore, since we have been justified
through faith, we have peace with God through
our Lord Jesus Christ, \vs{2}through whom we
have gained access by faith into this grace in
which we now stand. And we boast in the hope of
the glory of God.
\end{scripture}
```

¹Therefore, since we have been justified through faith, we have peace with God through our Lord Jesus Christ, ²through whom we have gained access by faith into this grace in which we now stand. And we boast in the hope of the glory of God.

Romans 5:1–2

chapter/nodrop chapter/nodrop = *boolean* Default: false
Whether the chapter should be set as a drop letter taking up two lines or as a normal letter taking up one line. The value of *boolean* is optional and assumed to be **true** if not present. This option is the opposite of **chapter/drop**.

```
\begin{scripture}[John 1:1--3] [chapter/nodrop]
\ch{1}In the beginning was the Word, and the
Word was with God, and the Word was God.
\vs{2}He was with God in the beginning.
\vs{3}Through him all things were made; without
him nothing was made that has been made.
\end{scripture}
```

¹ In the beginning was the Word, and the Word was with God, and the Word was God. ²He was with God in the beginning. ³Through him all things were made; without him nothing was made that has been made.

John 1:1–3

chapter/sep chapter/sep = *dimen* Default: 0.5em
<*dimen*> used to separate a \ch from the following text.

`chapter/show` `chapter/show = <boolean>` Default: true

New: 2022-08-15 Whether chapters should be shown or hidden. The value of `<boolean>` is optional and assumed to be `true` if not present. This option is the opposite of `chapter/hide`.

`chapter/showverse` `chapter/showverse = <boolean>` Default: false

New: 2022-11-14 Whether `\vs\{1\}` should be automatically inserted after `\ch`. The value of `<boolean>` is optional and assumed to be `true` if not present. See also `midparachap/showverse` and `midparachap/hideverse`. Note that `chapter/showverse` take precedence over `midparachap/hideverse`.

```
\begin{scripture}[John 1:1][chapter/showverse]
  \ch{1}In the beginning was the Word, and the
  Word was with God, and the Word was God.
\end{scripture}
```

1 ¹In the beginning was the Word,
and the Word was with God, and
the Word was God. **John 1:1**

`colour` `colour = <colour expression>` Default: .

`color` `The \color <colour expression> to be used for the scripture environment. By default`
New: 2022-08-31 `the current colour is inherited. color is an alias for colour.`

`compact` `compact = <boolean>` Default: false

New: 2022-08-15 This option removes all paragraph breaks along with any `\extraskip` in the quotation so the whole quotation is a single paragraph of running prose. This option implies `chapter/nodrop` and all options relating to inner environments are ignored.

The value of `<boolean>` is optional and assumed to be `true` if not present.

Warning: This option redefines `\par` to `\relax` inside the `scripture` environment. If you have anything other than expected macros and environments inside your `scripture` environment TeX will likely get stuck in an infinite loop.

```
\begin{scripture}[Jonah 1:17--2:2a][compact]
  \begin{midparachap}
    \vs{17}Now the \name{Lord} provided a huge
    fish to swallow Jonah, and Jonah was in the
    belly of the fish three days and three
    nights. \ch{2}From inside the fish Jonah
    prayed to the \name{Lord} his God. \vs{2}He
    said:
  \end{midparachap}
  \begin{poetry}
    'In my distress I called to the Lord,
    and he answered me.
  \end{poetry}
\end{scripture}
```

¹⁷Now the LORD provided a huge fish to swallow Jonah, and Jonah was in the belly of the fish three days and three nights. **2** From inside the fish Jonah prayed to the LORD his God.
²He said: 'In my distress I called to the Lord, and he answered me.

Jonah 1:17–2:2a

`extraskip` `extraskip = <skip>` Default: \medskipamount

`<skip>` used for the `\extraskip` function.

font `font = ` Default: Empty
 `` used for the `scripture` environment.

inline `inline = <boolean>` Default: false
New: 2023-01-07 Set the scripture quotation inline. The quotation is surrounded by the values of `inline/begin` and `inline/end` which default to “\, and \,, respectively. This option also sets the `compact` option set sets the `reference` inline. The reference format can be controlled using the following options:

- `inline/reference/format`
- `inline/reference/sep`
- `inline/version/delim`
- `inline/version/format`

Other `reference` and `version` options are inherited.

Warning: `\par` is redefined to `\relax` when the `inline` option is set. If you have anything other than expected macros and environments inside your quotation `TeX` will likely get stuck in an infinite loop.

inline/begin `inline/begin = <text>` Default: “\,
New: 2023-01-07 Text inserted at the beginning of `\textscripture` or a `scripture` environment with the `inline` option set.

inline/end `inline/end = <text>` Default: \,,
New: 2023-01-07 Text inserted between the end of `\textscripture` or a `scripture` environment with the `inline` option set and the `<reference>` (if specified).

inline/reference/format `inline/reference/format = <macro>` Default: (#1)
New: 2023-12-27 `<macro>` used to format the `reference` for an inline `scripture` quotation. #1 contains the text of the `reference` and `version` (if specified).

inline/reference/sep `inline/reference/sep = <dimen>` Default: 0.5em
New: 2023-12-27 The `<dimen>` between the end of an inline `scripture` quotation and its `reference`.

inline/version/delim `inline/version/delim = <delim>` Default: { }
New: 2023-12-27 `<delim>` to use between the `reference` and the `version` of an inline `scripture` quotation.

inline/version/format `inline/version/format = <macro>` Default: #1
New: 2023-12-27 `<macro>` used to format the `version` for an inline `scripture` quotation. #1 contains the text of the `version`.

indent `indent = <boolean>`

Default: `true`

Whether to indent the first line of a `scripture` environment or not by `parindent`. The value of `<boolean>` is optional and assumed to be `true` if not present. This option is the opposite of `noindent`.

language `language = <language name>`

Default: `Empty`

New: 2022-11-02 `babel` or `polyglossia` `<language name>` to be used for the `scripture` environment. This calls `\selectlanguage{<language name>}` at the start of the environment. Make sure you have `babel` or `polyglossia` loaded and correctly set up for your specified language. If unset the current active language is used.

language/variant `language/variant = <language variant name>`

Default: `Empty`

New: 2022-11-02 `polyglossia` `<language variant name>` to be used along with the specified `language` for the `scripture` environment. This inserts `\selectlanguage[<language variant name>]{<language name>}` at the start of the environment. Make sure you have `polyglossia` loaded and correctly set up for your specified language.

leftmargin `leftmargin = <dimen>`

Default: `0pt`

`<dimen>` used for the left margin of the `scripture` environment.

name/font `name/font = `

Default: `\scshape`

New: 2022-09-01 `` used for the `\name` function.

name/format `name/format = <macro>`

Default: `#1`

New: 2022-09-01 `<macro>` used to format the divine `name` using the `\name` function. `#1` contains the text of the argument to `\name`.

noindent `noindent = <boolean>`

Default: `false`

Whether to indent the first line of a `scripture` environment or not by `parindent`. The value of `<boolean>` is optional and assumed to be `true` if not present. This option is the opposite of `indent`.

```
\begin{scripture}[1 Peter 3:18][noindent]
\vs{18}For Christ also suffered once for sins,
the righteous for the unrighteous, to bring you
to God. He was put to death in the body but
made alive in the Spirit.
\end{scripture}
```

¹⁸For Christ also suffered once for sins, the righteous for the unrighteous, to bring you to God. He was put to death in the body but made alive in the Spirit. **1 Peter 3:18**

parindent `parindent = <dimen>`

Default: `\parindent`

`<dimen>` to use when indenting the first line of a paragraph in the `scripture` environment.

parskip `parskip = <skip>`

Default: `\parskip`

`<skip>` to use between paragraphs in the `scripture` environment.

<u>redletter</u>	<code>redletter = <boolean></code>	Default: false
New: 2022-08-31	Whether to enable highlighting of Jesus' words in red. The value of <boolean> is optional and assumed to be <code>true</code> if not present. The text needs to be marked up with <code>\redletteron</code> and <code>\redletteroff</code> for this option to have any effect.	
<u>redletter/colour</u>	<code>redletter/colour = <colour expression></code>	Default: red!80!black
<u>redletter/color</u>	The l3color <colour expression> to be used for the words of Jesus when the <code>redletter</code> option is <code>true</code> . <code>\redletteron</code> and <code>\redletteroff</code> must be used to mark up the text. <code>redletter/color</code> is an alias for <code>redletter/colour</code> .	
New: 2022-08-31		
<u>reference/align</u>	<code>reference/align = left right</code>	Default: right
New: 2023-01-08	Set the alignment of the reference. Note that in neither case will the reference break across lines.	
<u>reference/colour</u>	<code>reference/colour = <colour expression></code>	Default: .
<u>reference/color</u>	The l3color <colour expression> to be used for the reference and version. By default the current colour is inherited. <code>reference/color</code> is an alias for <code>reference/colour</code> .	
New: 2022-09-07		
<u>reference/font</u>	<code>reference/font = </code>	Default: \bfseries
	<code></code> used when printing the <code>reference</code> for a <code>scripture</code> quotation.	
<u>reference/format</u>	<code>reference/format = <macro></code>	Default: #1
	<code><macro></code> used to format the <code>reference</code> for a <code>scripture</code> quotation. #1 contains the text of the <code>reference</code> and <code>version</code> (if specified).	
<u>reference/newline</u>	<code>reference/newline</code>	
New: 2023-01-08	Always push the <code>reference</code> to a newline even if there is space for it to fit on the last line of the quotation. The option sets <code>reference/sep</code> to <code>\ linewidth</code> so there is never room for the reference on the final line of the quotation.	
<u>reference/sep</u>	<code>reference/sep = <dimen></code>	Default: 2em
	The minimum <dimen> allowed between the end of a <code>scripture</code> quotation and its <code>reference</code> before the <code>reference</code> is pushed to the following line.	
<u>rightmargin</u>	<code>rightmargin = <dimen></code>	Default: Opt
	<code><dimen></code> used for the right margin of the <code>scripture</code> environment.	
<u>selah/font</u>	<code>selah/font = </code>	Default: \itshape
	<code></code> used when printing <code>\selah</code> in a <code>poetry</code> environment.	
<u>selah/format</u>	<code>selah/format = <macro></code>	Default: #1
	<code><macro></code> used to format the <code>\selah</code> in a <code>poetry</code> environment. #1 contains the value of <code>selah/text</code> .	

selah/sep `selah/sep = <dimen>` Default: 1em

The minimum `<dimen>` allowed between the end of a poetry line and *Selah* before the *Selah* is pushed to the following line.

selah/text `selah/text = <text>` Default: Selah

`<text>` used to for \selah in a poetry environment.

style `style = <name>`

New: 2023-12-27 Set options previously saved with \scripturestyle. An error occurs if the style isn't defined.

textright/sep `textright/sep = <dimen>` Default: 1em

New: 2022-08-30 The minimum `<dimen>` allowed between the end of a line and text aligned to the right with \textright before the right aligned text is pushed to the following line.

verse/colour `verse/colour = <colour expression>` Default: .

verse/color `verse/color = <colour expression>` The \color{<colour expression>} to be used for verse numbers. By default the current colour is inherited. `verse/color` is an alias for `verse/colour`.

verse/first `verse/first = <boolean>` Default: false

New: 2022-11-13 In prose sections, print the verse number in a different format if it is at the start of the paragraph. The format and separation between verse and text are controlled with the `verse/firstformat` and `verse/firstsep` options. Use \noversefirst to suppress this at the next verse (e.g., if your quote starts mid-way though a paragraph and a normal verse should be printed). The value of `<boolean>` is optional and assumed to be true if not present.

```
\begin{scripture}[Luke 18:25--28][noindent,
  verse/first, version=NRSV]
\nofirstverse\vs{25}Indeed, it is easier for a
camel to go through the eye of a needle than for
someone who is rich to enter the kingdom of
God.''
\vs{26}Those who heard it said, ``Then who can
be saved?'' \vs{27}He replied, ``What is
impossible for mortals is possible for God.''
\vs{28}Then Peter said, ``Look, we have left our
homes and followed you.''
\end{scripture}
```

²⁵Indeed, it is easier for a camel to go through the eye of a needle than for someone who is rich to enter the kingdom of God."

26 Those who heard it said, "Then who can be saved?" ²⁷He replied, "What is impossible for mortals is possible for God."

28 Then Peter said, "Look, we have left our homes and followed you."

Luke 18:25–28 (NRSV)

verse/firstformat `verse/firstformat = <macro>` Default: #1

New: 2022-11-13 `<macro>` used to format the first \vs in a paragraph. #1 contains the argument of \vs. Only used if `verse/first` is true.

`verse/firstsep` `verse/firstsep = <dimen>` Default: 0.5em

New: 2022-11-13 `<dimen>` used to separate the first \vs in a paragraph from the following text. Only used if `verse/first` is true.

`verse/font` `verse/font = ` Default: Empty

`` used for the \vs function.

`verse/format` `verse/format = <macro>` Default: #1

`<macro>` used to format the \vs function. #1 contains the argument of \vs.

`verse/hide` `verse/hide = <boolean>` Default: false

New: 2022-08-15 Whether verses should be shown or hidden. The value of `<boolean>` is optional and assumed to be true if not present. This option is the opposite of `verse/show`. Note that the `scripture/verse/before` and `scripture/verse/after` hooks are still executed when verses are hidden.

```
\begin{scripture}[Colossians 1:15--16][verse/hide]
\vs{15}The Son is the image of the invisible
God, the firstborn over all creation.
\vs{16}For in him all things were created:
things in heaven and on earth, visible and
invisible, whether thrones or powers or rulers
or authorities; all things have been created
through him and for him.
\end{scripture}
```

The Son is the image of the invisible God, the firstborn over all creation. For in him all things were created: things in heaven and on earth, visible and invisible, whether thrones or powers or rulers or authorities; all things have been created through him and for him.

Colossians 1:15–16

`verse/sep` `verse/sep = <dimen>` Default: 0.05em

New: 2022-07-28 `<dimen>` used to separate a \vs from the following text.

`verse/show` `verse/show = <boolean>` Default: true

New: 2022-08-15 Whether verses should be shown or hidden. The value of `<boolean>` is optional and assumed to be true if not present. This option is the opposite of `verse/hide`.

`version` `version = <version>` Default: Empty

`<version>` added to the reference for a scripture quotation.

`version/delim` `version/delim = <delim>` Default: { }

`<delim>` to use between the reference and the version of a scripture quotation.

`version/format` `version/format = <macro>` Default: (#1)

`<macro>` used to format the version for a scripture quotation. #1 contains the text of the `version`.

2.4.1 Options for the `center` environment

If these options are passed directly to the `center` environment rather than to the package, `\scripturesetup` or the `scripture` environment, then the `center/` prefix should be dropped.

<u>center/aboveskip</u>	<code>center/aboveskip = <skip></code>	Default: <code>\medskipamount</code>
<code><skip></code> inserted above the <code>center</code> environment.		
<u>center/belowskip</u>	<code>center/belowskip = <skip></code>	Default: <code>\medskipamount</code>
<code><skip></code> inserted below the <code>center</code> environment.		
<u>center/leftmargin</u>	<code>center/leftmargin = <dimen></code>	Default: <code>0pt</code>
<code><dimen></code> used for the left margin of the <code>center</code> environment.		
<u>center/rightmargin</u>	<code>center/rightmargin = <dimen></code>	Default: <code>0pt</code>
<code><dimen></code> used for the right margin of the <code>center</code> environment.		

2.4.2 Options for the `flushright` environment

If these options are passed directly to the `flushright` environment rather than to the package, `\scripturesetup` or the `scripture` environment, then the `flushright/` prefix should be dropped.

<u>flushright/aboveskip</u>	<code>flushright/aboveskip = <skip></code>	Default: <code>\medskipamount</code>
<code><skip></code> inserted above the <code>flushright</code> environment.		
<u>flushright/belowskip</u>	<code>flushright/belowskip = <skip></code>	Default: <code>\medskipamount</code>
<code><skip></code> inserted below the <code>flushright</code> environment.		
<u>flushright/leftmargin</u>	<code>flushright/leftmargin = <dimen></code>	Default: <code>0pt</code>
<code><dimen></code> used for the left margin of the <code>flushright</code> environment.		
<u>flushright/rightmargin</u>	<code>flushright/rightmargin = <dimen></code>	Default: <code>0pt</code>
<code><dimen></code> used for the right margin of the <code>flushright</code> environment.		

2.4.3 Options for the `hanging` environment

If these options are passed directly to the `hanging` environment rather than to the package, `\scripturesetup` or the `scripture` environment, then the `hanging/` prefix should be dropped.

<u>hanging/aboveskip</u>	<code>hanging/aboveskip = <skip></code>	Default: <code>\medskipamount</code>
<code><skip></code> inserted above the <code>hanging</code> environment.		

<code>hanging/belowskip</code>	<code>hanging/belowskip = <skip></code>	Default: \medskipamount
	<code><skip></code> inserted below the <code>hanging</code> environment.	
<code>hanging/hang</code>	<code>hanging/hang = <dimen></code>	Default: 2em
	<code><dimen></code> used for the indent of subsequent lines of the <code>hanging</code> environment.	
<code>hanging/leftmargin</code>	<code>hanging/leftmargin = <dimen></code>	Default: 1em
	<code><dimen></code> used for the left margin of the <code>hanging</code> environment.	
<code>hanging/rightmargin</code>	<code>hanging/rightmargin = <dimen></code>	Default: 1em
	<code><dimen></code> used for the right margin of the <code>hanging</code> environment.	

2.4.4 Options for the `midparachap` environment

If these options are passed directly to the `midparachap` environment rather than to the package, `\scripturesetup` or the `scripture` environment, then the `midparachap/` prefix should be dropped.

<code>midparachap/hideverse</code>	<code>midparachap/hideverse = <boolean></code>	Default: false
	Whether a <code>\vs{1}</code> should automatically be inserted after a <code>\ch</code> when the <code>\ch</code> occurs mid-paragraph. This also affects <code>\ch</code> in <code>poetry</code> environments. <code>\extraskip</code> begins a new paragraph in a <code>poetry</code> environment. The value of <code><boolean></code> is optional and assumed to be <code>true</code> if not present. This option is the opposite of <code>midparachap/showverse</code> . See also <code>chapter/showverse</code> .	

```
\begin{scripture}[Hosea 11:12--12:1]
[Midparachap/hideverse]
\begin{poetry}
\vs{12}Ephraim has surrounded me with lies,
Israel with deceit.

And Judah is unruly against God,
even against the faithful Holy One.

\ch{12}Ephraim feeds on the wind;
he pursues the east wind all day
and multiplies lies and violence.

He makes a treaty with Assyria
and sends olive oil to Egypt.
\end{poetry}
\end{scripture}
```

¹²Ephraim has surrounded me with lies,
Israel with deceit.
And Judah is unruly against God,
even against the faithful Holy One.

12 Ephraim feeds on the wind;
he pursues the east wind all day
and multiplies lies and violence.
He makes a treaty with Assyria
and sends olive oil to Egypt.

Hosea 11:12–12:1

<code>midparachap/showverse</code>	<code>midparachap/showverse = <boolean></code>	Default: true
	Whether a <code>\vs{1}</code> should automatically be inserted after a <code>\ch</code> when the <code>\ch</code> occurs mid-paragraph. This also affects <code>\ch</code> in <code>poetry</code> environments. <code>\extraskip</code> begins a new paragraph in a <code>poetry</code> environment. The value of <code><boolean></code> is optional and assumed to be <code>true</code> if not present. This option is the opposite of <code>midparachap/hideverse</code> . See also <code>chapter/showverse</code> .	

2.4.5 Options for the narrow environment

If these options are passed directly to the `narrow` environment rather than to the package, `\scripturesetup` or the `scripture` environment, then the `narrow/` prefix should be dropped.

narrow/aboveskip `narrow/aboveskip = <skip>` Default: `\medskipamount`
`<skip>` inserted above the `narrow` environment.

narrow/belowskip `narrow/belowskip = <skip>` Default: `\medskipamount`
`<skip>` inserted below the `narrow` environment.

narrow/leftmargin `narrow/leftmargin = <dimen>` Default: `1em`
`<dimen>` used for the left margin of the `narrow` environment.

narrow/rightmargin `narrow/rightmargin = <dimen>` Default: `1em`
`<dimen>` used for the right margin of the `narrow` environment.

2.4.6 Options for the poetry environment

If these options are passed directly to the `poetry` environment rather than to the package, `\scripturesetup` or the `scripture` environment, then the `poetry/` prefix should be dropped.

poetry/aboveskip `poetry/aboveskip = <skip>` Default: `\medskipamount`
`<skip>` inserted above the `poetry` environment.

poetry/belowskip `poetry/belowskip = <skip>` Default: `\medskipamount`
`<skip>` inserted below the `poetry` environment.

poetry/bigindent `poetry/bigindent = <dimen>` Default: `4em`
`<dimen>` used for the indent subsequent lines of a line of poetry in a `poetry` environment if it needs to flow on to the following line.

poetry/indent `poetry/indent = <dimen>` Default: `1em`
`<dimen>` used for the second half of a line of poetry in a `poetry` environment.

poetry/leftmargin `poetry/leftmargin = <dimen>` Default: `1em`
`<dimen>` used for the left margin of the `poetry` environment.

poetry/rightmargin `poetry/rightmargin = <dimen>` Default: `0pt`
`<dimen>` used for the right margin of the `poetry` environment.

`poetry/verse/left` `poetry/verse/left = <boolean>`

Default: false

New: 2022-07-31 Align verse numbers in `poetry` environments at the left margin of the `scripture` environment. This option is the opposite of `poetry/verse/right`.

```
\begin{scripture}[Atcs 15:15--18]%
  [poetry/leftmargin=2em, poetry/verse/left]
  \vs{15}The words of the prophets are in
  agreement with this, as it is written:
  \begin{poetry}
    \vs{16}`\thinspaceAfter this I will return
    and rebuild David's fallen tent.

    Its ruins I will rebuild,
    and I will restore it,
    \vs{17}that the rest of mankind may seek the Lord,
    even all the Gentiles who bear my name,
    says the Lord, who does these things'---
    \vs{18}things known from long ago.
  \end{poetry}
\end{scripture}
```

¹⁵The words of the prophets
are in agreement with this, as it
is written:

¹⁶“After this I will return
and rebuild David's fallen
tent.

Its ruins I will rebuild,
and I will restore it,
¹⁷that the rest of mankind
may seek the Lord,
even all the Gentiles who
bear my name,
says the Lord, who does
these things”—

¹⁸things known from long
ago.

Atcs 15:15–18

`poetry/verse/right` `poetry/verse/right = <boolean>`

Default: true

New: 2022-07-31 Align verse numbers in `poetry` environments at the left margin of the `poetry` environment.
The verse numbers overlap to the left. This option is the opposite of `poetry/verse/left`.

`poetry/verse/sep` `poetry/verse/sep = <dimen>`

Default: 0.05 em

New: 2022-07-31 `<dimen>` used to separate a `\vs` from the following text in a `poetry` environment. This
is only used for verses at the start of a line.

3 Implementation

```
1  {*package}
2  {@@=scripture}
3  \NeedsTeXFormat{LaTeX2e}[2022-11-01]
4  \ProvidesExplPackage{scripture}{2023/12/27}{2.0}
5  {Format Scripture Quotations (DCP)}
```

3.1 Messages

`scripture` environments along with all internal environments can not be nested.

```
6  \msg_new:nnnn { scripture } { nested-environment }
7  { Nesting~of~scripture~environments-not-supported. }
8  { You~have~tried~to~nest~a~scripture~environment~or~\\
9   one~of~its~internal~environments,~which~is~not~supported. }

309   }
310 }
311 \cs_generate_variant:Nn \_\_scripture_setup_style:nnn { nne }

```

(End of definition for `__scripture_setup_style:nnn`.)

3.3 Hooks

```
scripture/chap/before  
scripture/chap/after  
scripture/verse/before  
scripture/verse/after
```

Hooks for before and after chapters and verses. The current chapter and verse is available in the hooks as `\scripturecurrentchapter` and `\scripturecurrentverse` respectively. These are global.

```
312 \hook_new_pair:nn { scripture / chap / before } { scripture / chap / after }  
313 \hook_new_pair:nn { scripture / verse / before } { scripture / verse / after }
```

(End of definition for `scripture/chap/before` and others. These variables are documented on page 10.)

3.4 The main scripture environment

```
\l__scripture_active_bool  
  \l__scripture_active_inner_bool
```

Flags to ensure that environments are not nested.

```
314 \bool_new:N \l__scripture_active_bool  
315 \bool_new:N \l__scripture_active_inner_bool
```

(End of definition for `\l__scripture_active_bool` and `\l__scripture_active_inner_bool`.)

```
\l__scripture_clubpenalty_saved_int
```

Holds saved club penalty so we can change and restore it around chapter breaks.

```
316 \int_new:N \l__scripture_clubpenalty_saved_int
```

(End of definition for `\l__scripture_clubpenalty_saved_int`.)

```
\g__scripture_prev_inner_below_skip
```

Save the last below skip of an inner environment so it can be removed if the main scripture environment ends with an inner environment.

```
317 \skip_new:N \g__scripture_prev_inner_below_skip
```

(End of definition for `\g__scripture_prev_inner_below_skip`.)

```
\l__scripture_outer_itemindent_dim
```

Holds the `\itemindent` of the outer list. Used to calculate the `\itemindent` to retain correct indenting when a list environment is the first thing in an outer list.

```
318 \dim_new:N \l__scripture_outer_itemindent_dim
```

(End of definition for `\l__scripture_outer_itemindent_dim`.)

```
\_scripture_setup_list_noindent:n
```

Set `\noindent` to do a negative horizontal skip a list is the first item in a list then restore it at the end of the paragraph. This allows `\itemindent` to be set to a negative value and still have `\noindent` behave as expected.

```
319 \cs_new_protected_nopar:Nn \_scripture_setup_list_noindent:n  
320 {  
321   \legacy_if:nT {@newlist}  
322   {

3.6 Public L^AT_EX Interface

`\scripturecurrentchapter` Globally stores the most recent argument of `\ch` and `\vs`. These could be used in hooks, for example.

```

1671 \cs_set_nopar:Npn \scripturecurrentchapter { }
1672 \cs_set_nopar:Npn \scripturecurrentverse { }

```

(End of definition for `\scripturecurrentchapter` and `\scripturecurrentverse`. These functions are documented on page 6.)

`\scripturesetup` #1 : `<options>` to set.
Set key-value settings.

```

1673 \NewDocumentCommand { \scripturesetup } { m }
1674 {
1675     \keys_set:nn { scripture } { #1 }
1676 }

```

(End of definition for `\scripturesetup`. This function is documented on page 6.)

`\scripturestyle` #1 : `<name>` of the style.
#2 : `<options>` to set for the style.
Set key-value settings to be applied when using the `style` option with value `name`. The starred version appends the `options` to any existing ones.

```

1677 \NewDocumentCommand { \scripturestyle } { s m m }
1678 {
1679     \__scripture_setup_style:nnn { #1 } { #2 } { #3 }
1680 }

```

(End of definition for `\scripturestyle`. This function is documented on page 6.)

`\textscripture` #1 : `<reference>` of quotation.
#2 : `<options>` to set.
#3 : `<quotation>` text.
Set an inline quotation. This is equivalent to calling the `scripture` environment with the `inline` option set.

```

1681 \NewDocumentCommand { \textscripture } { o o +m }
1682 {
1683     \tl_if_novalue:nTF { #2 }
1684     {
